About Telemisis

Based in the UK, we have been leading the way in the design, development and manufacture of remote monitoring solutions for over 20 years.

We created SitePro to monitor key elements of fleet performance for generators, compressors, chillers, boilers, pumps and many other pieces of equipment, all in one easy to use system.

SitePro can work with a huge range of new and legacy machines and fit with existing management systems, helping businesses maximise productivity, operational efficiency and service delivery.

Our expert technical services team is skilled in supporting SitePro application for specific business, sector or manufacturer needs, and provides seamless and friendly customer support.

A Growth Partner

“Aggreko has used Telemisis remote monitoring since 2009 and we have received excellent and reliable service to keep the system up-to-date with our changing business demands.”

Stephen Doherty
Product Manager, Aggreko

SitePro[®]

SitePro is a complete remote monitoring and control system which provides comprehensive real-time feedback of any changes to remote equipment so helping to maximise fleet productivity and operational efficiency, security and service, ensuring financial and environmental savings.

The SitePro system is easy to buy, install and manage, with a simple set up package and a monthly service fee - all backed by a **Telemisis Performance Guarantee**.

Return on investment is typically delivered in less than 12 months, with opportunities to sell-on SitePro benefits as an added service.

1 SIMPLICITY

A single, compatible system that plugs into your whole business for **instant accurate results**

1. SitePro interface kits fit most fleet power, heat and cooling models, controllers and tanks
2. Cloud based data is accessible from multiple digital devices by multiple users
3. SitePro software works with an extensive range of your existing IT and data systems
4. Information appears on a pre-set performance dashboard which can be individually tailored
5. Simple and affordable monthly service price and no additional SIM required.

2 PRODUCTIVITY

The total oversight to maximise real-time machine and fleet productivity driving **business growth every day**

1. Real time data analyses hours, fuel consumption and events outside expected range
2. Records machine usage and condition, linking information with existing back office systems
3. Helps plan investment and resources to maximise business profitability and growth
4. Dashboards designed for industry performance management
5. Superior intelligence allows for more strategic fleet planning.

3 EFFICIENCY

Better time, resource and financial management for **improved profitability**

1. Better remote engineering access
2. Automatic intelligence on machine condition and early warning of possible failures
3. Maintenance tracked and automatically scheduled when needed
4. Tracks exact location of mobile assets. Geo-fencing provides added security & functionality
5. Savings in money, time and precious environmental resources.

4 SERVICE

Quicker customer response and added value delivering **competitive advantage**

1. Know immediately when your customer needs help/support
2. Manage issues to hit your SLAs every time
3. Forward plan machine fleet composition from customer usage data
4. Offer machine monitoring as an added service or revenue stream
5. Sell the benefits of machine monitoring to customers and sales teams.

How it Works

Simply connect the SiteNode to each machine.
Switch on and log-in to the SitePro system. Track, analyse and manage machine data using the SitePro dashboard and adapt to meet your monitoring needs.

Set Up in Five Simple Steps

1. Simply connect the durable, state of the art SiteNode to your machine using the SitePro Interface kit. Once powered-up the SiteNode will automatically connect to the SitePro monitoring service using the cellular SIM provided
2. Log-on to SitePro using the browser on your PC, laptop, tablet or mobile phone, and select the configuration that matches your machine or tank. Live, dynamic data will be streamed directly to your dashboard 24/7 through the cellular connection via secure cloud based servers
3. Your performance monitoring dashboard is set up for the data access, alerts and controls most commonly used in the industry, and can be customised to fit individual management and measurement needs
4. A secure log-in enables you or your customer to see all of your equipment in one easy view, with 'at a glance visibility' of the condition of all your equipment and straightforward access to more detailed information as needed. Tiered access levels can be applied to protect or share information and control as needed
5. Your equipment can be viewed and controlled from wherever you are via the web browser on your computer, tablet or mobile phone through our simple, secure and adaptable SitePro user interface.

SitePro®

SitePro provides access to your machines in flexible ways:

Through its web interface supported by all mainstream browsers

1. Fleet wide and machine-focused dashboards providing at a glance visibility of key information and easy drill down for more detail
2. Easy to use geographical maps interface to easily find location of your machines and tanks with click through to get more detailed information
3. List views with powerful filters and search feature to locate equipment in larger fleets
4. Graphing of historical trends including comparison of readings on the same timeline
5. Maintenance and refuelling screens for quick access to information to manage service activities plus easy creation of automatic reports.

Through its mobile application

1. Easy access to your machines while on the go through a clear and concise mobile app
2. Scan to access information makes engineer use of the mobile app on site simple and swift.

'System-Wide and Equipment-Focused Dashboards'

Experience

aggreko

'SitePro was adopted by Aggreko in 2009 after rigorous test and comparison with other solutions and full analysis of the return on investment. The system has proven to be so worthwhile for Aggreko's business that over the past 12 years it has installed SitePro over most of its global fleet and continues to operate and expand its use year by year. We feel we have played an active role in progressing Aggreko's ambitious global vision and fast track growth strategy through our monitoring expertise.'

Tony Richardson, Managing Director, Telemis

BOC

'SitePro has proven to be a valuable tool for monitoring gas production (pressure, flow, purity) on our client sites. This first rate system is backed up by a helpful team from Telemis which has made installing and using the system a pleasure.'

Catherine Begley, Project Engineer, CES, BOC Gases

Eaton Towers

'SitePro has proven its worth by helping Eaton Towers reduce site OPEX and enhance operational efficiencies. The system is reliable and Telemis has always provided a quick, professional and helpful service and are a pleasure to deal with.'

Jim Burns, Operations Director, Eaton Towers

Getting Started

Whether your equipment monitoring needs are large or small you get the reassurance of our unique **SitePro Performance Guarantee**.

1. A consultation with our team will help to understand your needs and let us know how many machines you want to monitor and which functions are to be measured. Our technical support team will explain the various modes of operation and the benefits to you and your business.
2. Based on your specific requirements we'll deliver machine and tank interface kits to your chosen locations. The Telemis technical support team can offer installation help including the training of your own engineers.
3. Once the kits are fitted to your equipment, power them up and they will automatically connect to the SitePro monitoring service, it's that simple!
4. Log-on to SitePro using your browser and select the configuration that matches your machine or tank and start enjoying the benefits.
5. To help you get the most from your investment Telemis provides additional training and support.
6. It's worth remembering, what you have today may change in the future. Our ongoing account management will help you achieve maximum benefits from SitePro as you grow because we understand the need to plan and adapt to achieve you goals.
